PAYMENT POLICY

You have insurance:

Payment is due at the time of service and will be collected before you see the doctor. If you have insurance we will file the claim for you and you are only responsible for your co-payment at the time of service. If there is a balance left after the claim has been processed we will bill you. In the case there is a balance due after processing your claim and it has not been paid by the time you return for another appointment the balance due and your copay must be paid at the time of service. If you are unable to make a payment, arrangements must be made prior to your appointment. Payment arrangements can be made with the office manager or billing coordinator.

You do not have insurance:

If you do not have insurance we offer very generously discounted prices for treatment and lab work. There will be a mandatory \$100 deposit, in cash or credit only, at your initial visit. The actual cost of the visit is determined by the level of service rendered. If the total cost of the visit is less than \$100 you will be refunded the difference. Likewise, if the total cost of the visit is more than \$100 the difference is due when you check out. We recommend that you be prepared for a total cost of \$160 for your visit. This just a recommendation and does not guarantee a specific total cost.

We can also provide resources to help you explore affordable and income based insurance options.
